Credit and Payment Risk Policy

Version 3.2 - Effective 1 January 2026 - Internal

1. Payment Terms

Standard payment terms are Net 30. Net 45 terms are available only to Enterprise customers with CFO approval. Terms longer than Net 45 are not permitted.

2. Late Payment Monitoring

Three or more late payments within 12 months place the account on Credit Watch. Five or more late payments trigger a formal credit review and may require prepayment for renewals.

3. Collections Process

Invoices 30 days overdue receive an automated reminder. Invoices 45 days overdue are escalated to the Collections team. Invoices 60 days overdue trigger a credit hold on new orders and service expansion.

4. Late Fees

A late fee of 1.5 percent per month is charged on overdue balances, unless waived by the Finance Director.

5. Interaction with Retention

Credit Watch accounts with high churn risk require a joint review by Finance and Customer Success before any retention discount is offered.
